

Welcome Note

January 21, 2011

2011 is upon us and I hope it is a bright and prosperous year in all respects for everyone. After less than 7 months since its official launch, ***Dynamic Energy & Water Solutions*** has entered a new phase and is undergoing some changes to stay current and relevant. We have *refreshed* our portfolio, introducing new partners or suppliers, while ending or curtailing other relationships.

If you are visiting the **DEWS** Website for the first time or stumbled on us by mistake, then we are delighted to welcome you to our Home. If you are a returning or frequent visitor, then we are very pleased to welcome you back !! As you browse our pages, you will find useful information and valuable resources relating to renewable energy (Solar in particular) and water treatment solutions.

In addition to details about our company, the products and services we offer, our business partners, and the latest *DEWS news*, we have assembled a number of helpful reports, studies, and useful links for our customers and visitors in a page we call [Renewable Resources](#). There, you're bound to find something to pique your interest, to borrow for your work, or simply to read and learn more about a topic of importance to you and the world we live in. Do visit often because, as the name suggests, they are renewable and are being refreshed from time to time.

We like to think that **DEWS** offers a fresh perspective on Energy and Water, doing our small part to conserve these vital ingredients of a better and more sustainable life.

As always, enjoy surfing our sunny skies and clean waters... and please do not hesitate to drop us a line if you like what you see or have a question, comment, suggestion, or a story of your own to share.
